Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, drawn to a method of producing an amino acid, classified in class 435, subclass 25.
- II. Claims 18-25, drawn to a method of producing an amine, classified in class 435, subclass 25.
- III. Claims 26-30, drawn to a method of producing an alcohol, classified in class 435, subclass 25.

The inventions are distinct, each from the other because:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions produce different types of products with different types of enzymes and in the case of Group I vs. Groups II and III employ different types of starting materials.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
